

Hrithik Carbide
ALWAYS ON THE CUTTING EDGE

NEW GENERATION SOLUTIONS
**CUTTING TOOLS
MANUFACTURING**

- | Drills
- | Endmill
- | Ballnose
- | Reamer
- | Profile Cutters
- | T Slot Cutter

- Manufacturing Carbide Tools as per Requirement
- Resharpener on CNC with Original Geometry
- Hobs & Shaper Cutters Resharpener & Recoating
- Dies and Inserts Coating with Diamond Polishing

24X7 SERVICE

WOULD YOU LIKE TO KNOW MORE

Hrithik tools Pvt Ltd, was incorporated in year 2000 under the leadership of Mr. Suresh Mittal as CNC Regrinding Service Company in Pune, India.

The company grew from year 2000 to 2007 in the field of Carbide Tools and Regrinding Services all over India.

In 2008 Hrithik Tool entered in the field of providing job coating services. With the technical collaboration of an European company, The company has installed world class quality job coating plant where all

major types of coatings are provided for a number of commercial, industrial and medical applications.

The Job coating services under the dynamic leadership of Mr. Suresh Mittal is today catering 400 plus cutting tool companies all over India.

NEW GENERATION SOLUTIONS PVD COATING

Tin Coating

Standard Coating with Broad Applications

Tin Coating has been the pioneer in PVD Coating field. Even today people are obsessed with colour gold due to which this coating has many users even after so many years of introduction.

Xpower Coating

New Generation coatings for drilling application

The latest coating process from our coating systems has enhanced the performance parameters of the coating. New coating compositions and optimisation of coating processes have resulted in high performance coatings like the X-power coating. The pre and post treatments ensure that the tool performs to its maximum resulting in high productivity and superior quality.

YOUR PARTNER IN COATING TECHNOLOGY

AlTiN Coating

High strength with excellent wear resistance

AlTiN Coating, the monolayer coating stands out due to the high content of Aluminum, which enables high performance in hard to cut material machining. This coating gives excellent protection against abrasion and adhesion. Its good frictional properties reduce cutting forces.

Xhelix Coating

Gives Your drills that extra performance

Whether you are drilling in steel or cast iron, X - Helix Coating gives you that crucial extra twist. The superior properties of this new coating generation have been optimised especially for drills resulting in the following benefits

- Improve Productivity
- Increase Process Reliability
- Reduce the environmental impact
- Reduce Production Cost
- Shorten Delivery Times
- save resources

Highly Technical and Qualified Team for Research and Development of new Coatings.
